INSECTOR HECTI IN THE INTER CHANGE

Insector Hecti, the HI-TEC Hero, the world's first computerised detective has been sent to the INTERCHANGE, Victor Virus and his gang have invaded this highly sensitive area and it's up to our hero to put matters to rights.

You take the part of Insector Hecti, you must free the whole of the fifty areas of the INTERCHANGE by re-aligning all the junction blocks and at the same time rid the area of Victor and his vicious gang.

An audible noise shows when a block is in its correct position.

A number of different types of bug exist, each with its own pattern of movement. Study these patterns carefully or they could be your undoing.

You have a number of weapons at your disposal, details of which are shown opposite.

NOTE: Some weapons are teleported in from W of the Special Weapons Dept. at H.Q.

There is a time limit for each area, and if you clear that area faster than your predecessor you will be notified.

Should you run out of time or hit a bug, or worse still fall out of the area, you will lose one of your five lives. Lose all five lives and the game is over.

You can however, restart the game to within four areas from the furthest area you have reached by using the access codes given every five levels.

This is the background to the mission, it's all up to you now INSECTOR HECTI.

LOADING INSTRUCTIONS
LOAD "X", 8, 1 RETURN

Controls:

Joystick only
Use joystick port 2
F - Pause

	<p>THE BALL</p> <p>The first, and most important of these is a bouncing weapon with a limited range but will destroy any Bug it contacts. They are fired by moving in the direction you wish to fire it and pressing 'Fire'. You may only use one of these at a time and their number is limited. However, replenishments are teleported in from time to time.</p>
	<p>IMPLODER</p> <p>When this item is teleported in, collecting it will destroy all the Bugs on that Interchange.</p>
	<p>SHIELD</p> <p>Collecting this will allow you to destroy the Bugs simply by walking into them. However it will only last for a limited time.</p>
	<p>SPEED-UP</p> <p>Allows you to move faster. As the previous two, this only lasts a short time.</p>
	<p>STASIS</p> <p>This freezes the Bugs on an Interchange. However, contact with them is still fatal, and as the shield, only lasts for a short time.</p>

MORE NEW AND ORIGINAL GAMES BASED ON FAMOUS HANNA BARBERA CHARACTERS

HI-TECS' first series of games based on YOGI BEAR, HONG KONG PHOOEY, RUFF & REDDY and ATOM ANT proved to be so popular and with so many requests for us to produce games based on your other favourite Hanna Barbera characters, how could we refuse? We couldn't -

SPAN:1

Insector Hecti, el Héroe HI-TEC, el primer detective computerizado del mundo a sido enviado al INTERCAMBIO, Victor Virus y su brigada han invadido esta área altamente sensibilizado y depende de nuestro Héroe aclarar los acontecimientos.

Tú ocupas el lugar del Insector Hecti, tienes que liberar por completo las cincuenta áreas del INTERCAMBIO alineando de nuevo toda la unión de fijaciones de cambios de vía y al mismo tiempo liberar el área de Victor y su brigada maligna.

Un audible sonido te avisará cuando una fijación esté en su posición correcta.

Existe un número de diferentes tipos de insectos, cada uno con su propio modelo de movimiento. Estudia estos modelos muy cuidadosamente de lo contrario ellos podrían ser tu destrucción.

Posees un número de armas a tu disposición, cuyos detalles són mostrados más abajo.

	THE BALL La primera y más importante de ellas es un arma robusta, de alcance limitado, pero capaz de destruir a cualquier insecto con el que choque. Se dispara avanzando en la dirección en la que se desea disparar, y pulsando 'Disparo'. Sólo puedes usar una de estas armas a la vez, y existen en cantidad limitada. Sin embargo de vez en cuando se teletransportan reaprovisionamientos.
	IMPLODER Al recoger este arma cuando está siendo teletransportada, se destruirán todos los insectos de ese Interchange.
	SHIELD El hecto de recogerla te permitirá destruir a los insectos con sólo arremeter contra ellos. No obstante, elle durará sólo por un tiempo limitado.
	STASIS Esto congela a los insectos de un Interchange. De todos modos, el entrar en contacto con ellos es fatal, y la cape protectora sólo dura un breve espacio de tiempo.
	SPEED-UP Te permite desplazarte de forma más rápida. Al igual que las dos anteriores, sólo dura un breve espacio de tiempo.

NOTA: Algunas armas són teletransportadas en forma de W del Departamento de Armas Especiales al Cuartel General (Special Weapons Dept. at H.Q.).

Hay un tiempo limitado para cada área, y si desocupas el área más rápido que tu predecesor, te será notificado.

Si se acaba el tiempo, si golpeas un insecto, o peor todavía caerte fuera del área, perderás entonces una de tus cinco vidas. Pierde todas las cinco vidas y el juego está acabado.

De todas maneras, puedes volver a empezar juego comenzando de nuevo cuatro áreas hacia atrás, desde el área más lejana que hayas alcanzado, usando el código de accesos dados en cada uno de los cinco niveles.

Esta es toda la historia de la misión, ahora todo depende de ti INSECTOR HECTI:
